by FQ Specialty Chemicals.

Luna CO Colors are a unique line of pre-dispersed pigments of Bismuth Oxychloride and Color, designed specifically for Lip Cosmetic Formulations (Lipsticks, Lip gloss, etc).

They come in either Castor Oil; or Castor Oil Esters; or TDTM; or blends of TDTM with other esters, depending on the desired viscosity of the final product. Typical esters that can be blended with TDTM are isodecyl trimellitate, isopropyl myristate, isopropyl palmitate, tridecyl stearate, tridecyl myristate, tridecyl palmitate, isodecyl trimellitate, propylene glycol dicaprate/dicaprylate, neopentyl glycol dicaprate, trisodecyl trimellitate, and dipentaerythritol hexacaprylate/hexacaprate.

These cosmetic pearlescent pigments impart a rich luster, nacreous brilliance and color to Lips.

New colors can be tailored exclusively for each cosmetic manufacturer upon specific color tones, product lines and other requirements.

Luna CO COLORS				
Product Name	Color	BiOCl %	Predispersed Color Pigment %	Dispersing Media %
